Reviews

It is one of the most popular books. I am quite late in starting to read this one, but better than never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

THE NEW POLITICS OF STATE HEALTH POLICY

University Press of Kansas. Paperback. Book Condition: new. BRAND NEW, The New Politics of State Health Policy, Robert B. Hackey, David A. Rochefort, With the collapse of national health care reform efforts in the early 1990s, states emerged as a focal point for new policy and administrative developments in U.S. health care. This book provides a timely overview of the key issues facing states as they have responded to this challenge. It tells how states are making decisions about health policies and then putting them into action - and how legislatures, executives, courts, and bureaucracies all participate in this process. The New Politics of State Health Policy describes many of the major trends in states' responses to health care problems of the 1990s, and it identifies the forces that will influence state policy actions in the new century. It examines reforms now under way, from Medicaid to tobacco control to mental health, and addresses today's most pressing issues surrounding managed care, health insurance, and public health administration. Editors Hackey and Rochefort have brought together a distinguished group of scholars and practitioners in the field of health policy analysis. Frank Thompson, Theodore Marmor, Michael Dukakis, and others map out the different institutional frames shaping how each state approaches the health care domain. While some states deliberate over universal coverage, others have shifted to the county level decisions once made in Washington, D.C. But all face the difficulty of taking on unprecedented responsibilities with limited resources amid the often-conflicting concerns of public management and "moral politics." Each contribution in the volume explores the interplay between state governance and health care policy by addressing four themes: the capacity of states to fulfill their new health care roles, the significance of recent policy changes, patterns in the politics of state health policy making, and...
