Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. In this book, Ediho Lokanga presents an original and compelling approach to reality in which he argues that our universe is a programmed information system. Requiring no prior scientific knowledge, this indispensable book argues that computing permeates the universe and drives every action. Everything in the universe, from atoms to molecules (whether animate and inanimate) wherever they are, is performing computation. Every constituent of the universe is manipulating information continuously. This book offers a new view to look at the universe and understand its self-programming, functioning characteristics, and its various aspects as a computer system. The universe as a programmed information system necessitates the existence of a master program which the author calls microvita cosmic master program (MCMP). The concept of microvita, with required modifications, has been successfully applied to the computer model of the universe.
